PROFILE SUMMARY

Mathematics graduate skilled in SQL, Python, and Power BI, with strong analytical and problem-solving skills built on a quantitative foundation. Experienced in exploratory data analysis, dashboard development, and translating complex datasets into clear, actionable business insights. Seeking an entry-level Data Analyst or Apprenticeship role to apply these skills in a fast-paced, data-driven team.

EDUCATION

B.Sc. (Hons) in Mathematics

2021-2024

M S Ramaiah University of Applied Sciences

- Strong foundation in quantitative reasoning, statistics, and logical problem-solving, directly applicable to data analysis and pattern identification.

TECHNICAL SKILLS

- **Query & Programming Languages:** SQL (joins, CTEs, window functions), Python
- **Data Visualization / BI Tools:** Power BI, Dashboard Reporting, Microsoft Excel
- **Database Tools:** SQL Server Management Studio (SSMS), Microsoft SQL Server
- **Productivity Tools:** Google Workspace, GitHub, VS Code

PROJECTS

E-Commerce Business Insights — SQL & Power BI

- Developed an end-to-end e-commerce analytics project on a real-world dataset containing 100,000+ orders.
- Wrote 30+ SQL queries covering Finance, Customer, Product, Order & Delivery, and Business Performance analytics.
- Built an interactive 3-page Power BI dashboard with DAX, Key Influencers, Decomposition Tree, KPI cards, slicers, and AI-driven business insights.
- Found that 97% of orders were delivered successfully (avg. 12-day delivery time) and that credit card payments drove ~78% of total revenue ~R\$16M across ~76,800 transactions.
- Used CTEs, Window Functions, Ranking Functions, Joins, CASE statements, and Subqueries to derive business insights.

Sales Analytics Dashboard — Python & Power BI

- Analyzed a retail sales dataset containing 51K+ records and 21 business attributes using Python, Pandas, NumPy, and Matplotlib.
- Performed 20+ business analyses across sales trends, customer segmentation, product performance, regional revenue, shipping efficiency, and profitability.
- Applied data cleaning, feature engineering, and exploratory data analysis (EDA) to uncover actionable business insights.
- Created visualizations and business recommendations to support data-driven decision-making.

KEY STRENGTHS

- Self-directed learner with a proven ability to learn new tools and technologies, resulting in two end-to-end analytics projects using SQL, Python, and Power BI.
- Strong analytical and problem-solving skills, with experience translating raw data into actionable business insights through structured analysis and visualization.
- Effective written and verbal communicator, experienced in documenting methodologies and presenting analytical findings in a clear and organized manner.
